

## Data Visualization - End assignment data sources

09/06/2020

Module 8: Data: From the Source to the Senses

Creative Technology

University of Twente, Enschede

Xian Bodelon Ruibal	s2110814
Rayhan Aryoseno Bayuaji	s2111446
Jasper-Sebastian Häsler	s2085275
Wannes Vanwinsen	s1943251
Daffa Paramitha	s2150603

Main topic: Human trafficking

Subtopics:

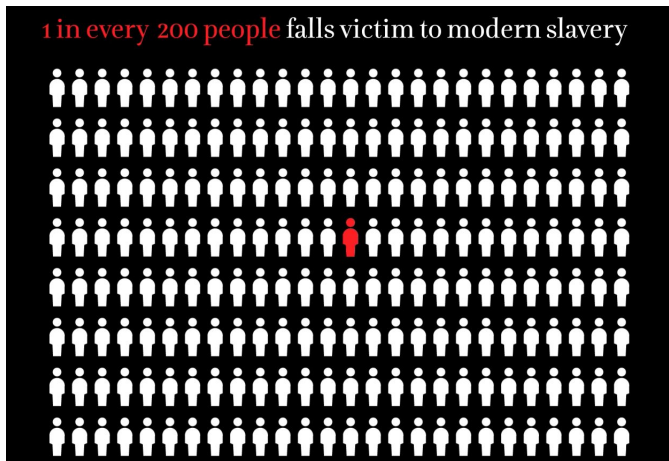

1. Types of trafficking
2. Region of operation
3. Government intervention and measures
4. Revenues and money flow
5. Consequences on victims

The collected data were all visualized and animated using Adobe After Effects. A video was then rendered and uploaded to YouTube, which can be found on the following link:

<https://www.youtube.com/watch?v=dP4zXbsAEs0> .

This document holds screenshots taken from the rendered video, after which a list of datasets of the used datasets can be found, along with the pre-processing methods and other tools used. Timestamps of the visualizations are added next to their titles, for convenience. A Tableau visualization was made along the rendered video, as the interactivity could not be rendered in Adobe After Effects. The interactive visualization is described in figure 17, and a video of the interaction can be found in the .zip file. The Tableau file is attached in the .zip file as well.

1. Number of victims in modern slavery (00:17 - 00:18)

Data sources

*Slavery affects more than 40 million people worldwide – more than at any other time in history*

by Kate Hodal

<https://www.theguardian.com/news/2019/feb/25/modern-slavery-trafficking-persons-one-in-200>

Pre-processing methods

None used.

Tools used

Excel was used to neatly organize the data.

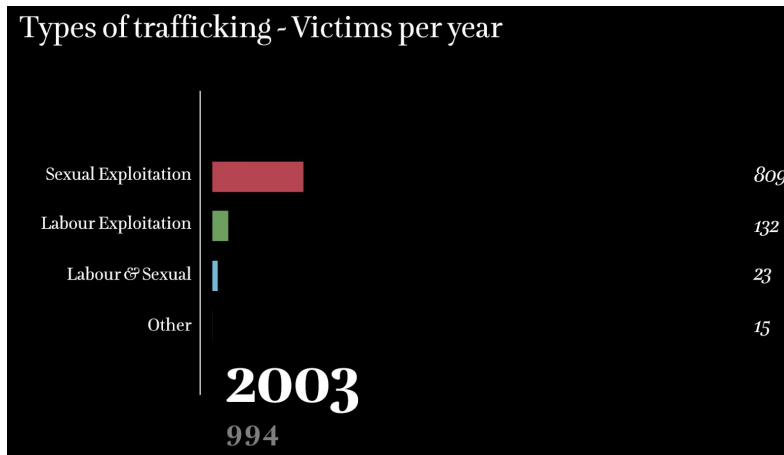

Description

A visualization of 200 humanoid icons, of which 1 is colored differently than the rest. The visualization indicates the amount of people affected by modern slavery.

Data acquired by

Jasper Häsler

## 2. Number of victims of human trafficking, categorized by trafficking type (00:20-00:38)

### Data sources

Counter trafficking data collaborative

<https://www.ctdatacollaborative.org/dataset/iom-data-dashboard/resource/49c96acc-0931-462d-ba94-22d67511c711>

### Pre-processing methods

None used.

### Tools used

For this visualization, Tableau was used to create a general idea of the charts, which was then translated into Adobe Illustrator. Excel was also used to neatly organize the data.

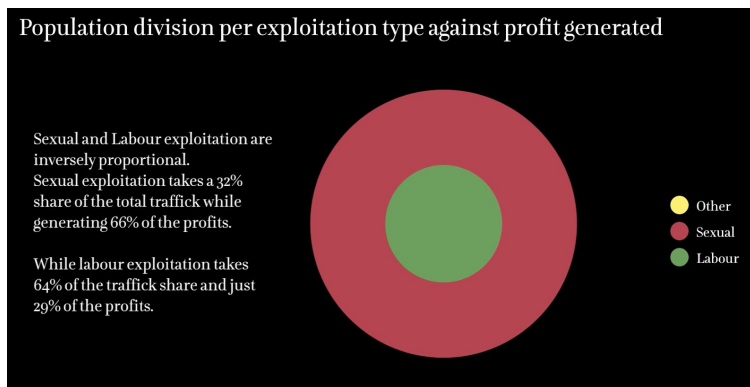

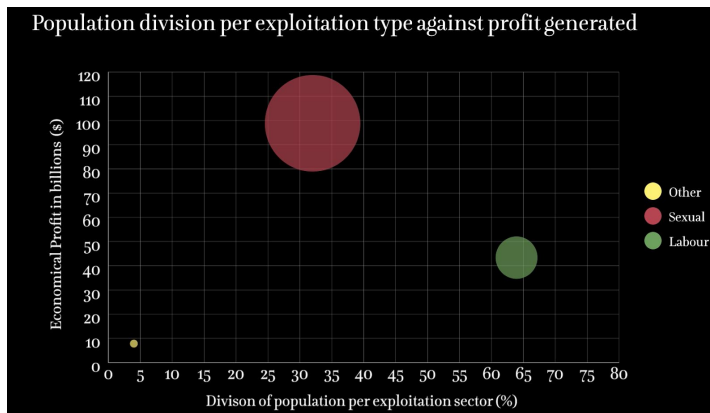

### Description

Visualization of the amount of trafficking victims per year, categorized into types of trafficking. The bar charts show data from 2002 up until 2018.

### Data acquired by

Jasper Häsler

### 3. Division of population per exploitation sector against generated profit (00:51-01:04)

#### Data sources

*Counter trafficking data collaborative*

<https://www.ctdatacollaborative.org/dataset/iom-data-dashboard/resource/822022e2-f51c-46cb-8291-dbd4ada37a98>

*Profits and poverty: The economics of forced labour by the International Labour Office*

[https://www.ilo.org/wcmsp5/groups/public/@ed\\_norm/@declaration/documents/publication/wcms\\_243027.pdf](https://www.ilo.org/wcmsp5/groups/public/@ed_norm/@declaration/documents/publication/wcms_243027.pdf)

#### Pre-processing methods

The two different datasets were combined and organized into new sets of rows and columns.

#### Tools used

For this visualization, Tableau was used to create a general idea of the charts, which was then translated into Adobe Illustrator. Excel was also used to neatly organize the data.

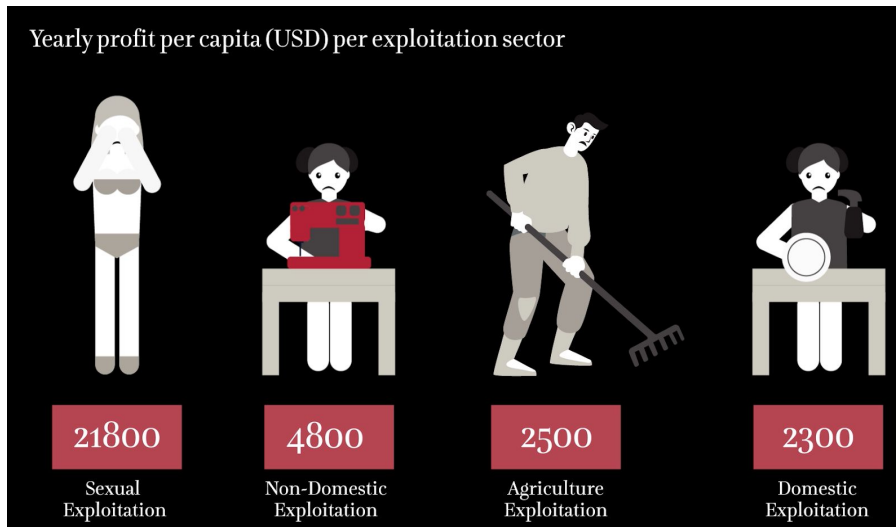

#### Description

Visualization of the amount of the profits generated per exploitation type. The profit is emphasized by the bubble sizes.

#### Data acquired by

Xian Bodelon Ruibal

#### 4. Yearly profit per capita per exploitation sector, in USD (01:14-01:19)

#### Data sources

*Statista*

<https://www.statista.com/statistics/307432/annual-per-victim-profit-from-forced-labour-by-sector-of-exploitation/>

#### Pre-processing methods

The dataset was acquired and then reorganized into new rows and columns.

#### Tools used

Excel was used to neatly organize the data.

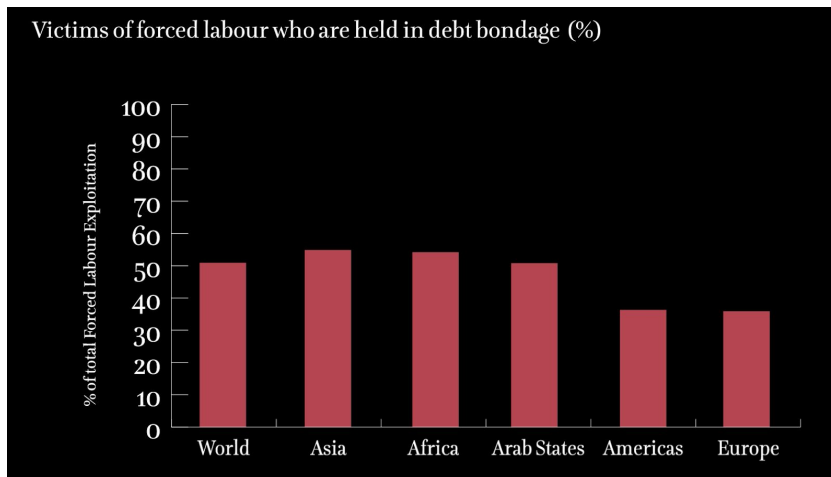

#### Description

Visualization of the profits earned by the victims of trafficking, categorized into exploitation type.

#### Data acquired by

Xian Bodelon Ruibal

## 5. Percentage of victims of forced labor who are held in debt bondage (01:27-01:32)

### Data sources

*Global Estimates of Modern Slavery: Forced labor and forced marriage by the International Labor Office. Geneva, 2017.*

[https://www.ilo.org/wcmsp5/groups/public/---dgreports/---dcomm/documents/publication/wcms\\_575479.pdf](https://www.ilo.org/wcmsp5/groups/public/---dgreports/---dcomm/documents/publication/wcms_575479.pdf)

### Pre-processing methods

The dataset was acquired and then reorganized into new rows and columns.

### Tools used

Excel was used to neatly organize the data.

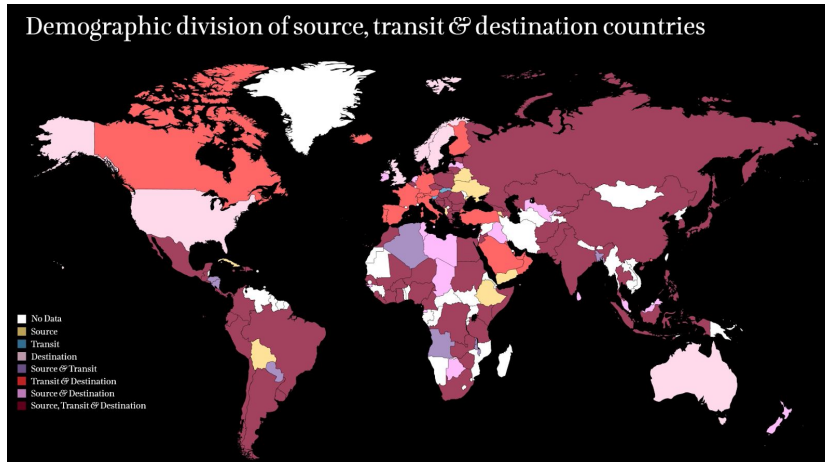

### Description

Visualization of the percentage of victims who were forced into trafficking because of a debt bondage.

### Data acquired by

Xian Bodelon Ruibal

## 6. Demographic division of source, transit, and destination countries (01:39-01:43)

### Data sources

*Estimating human trafficking into the united states: development of a methodology.*

<https://www.ncjrs.gov/pdffiles1/nij/grants/221035.pdf>

*EMpower*

<https://empowerweb.org/global-reach>

*Refworld Country Reports*

<https://www.refworld.org/type,COUNTRYREP,....0.html>

### Pre-processing methods

Different datasets were acquired from the sources, which were then combined into a single dataset and coupled to the countries involved.

### Tools used

Excel was used to neatly organize the data.

### Description

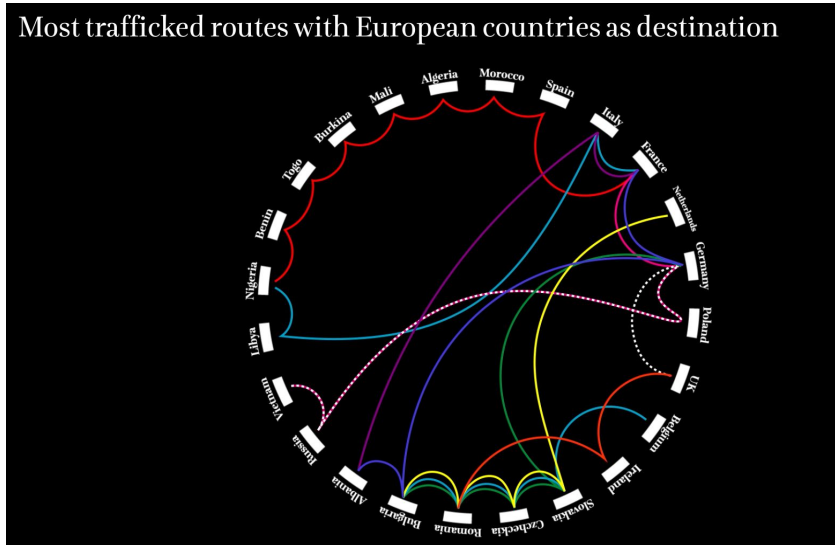

A world map with colour indications for each country indicating whether it is known as a trafficking source, transit or destination country or combination thereof.

Certain countries are left blank due to a lack of conclusive data.

### Data acquired by

Wannes Vanwinsen

7. **Most trafficked routes with European countries as destination (01:45-01:58)**

Data sources

*Freedom collaborative*

<https://www.freedomcollaborative.org/victimjourneys>

Pre-processing methods

The data source was reduced to only show West-European countries as destinations. From there, the five most frequented routes were taken and visualized.

Tools used

Excel was used to neatly organize the data.

Description

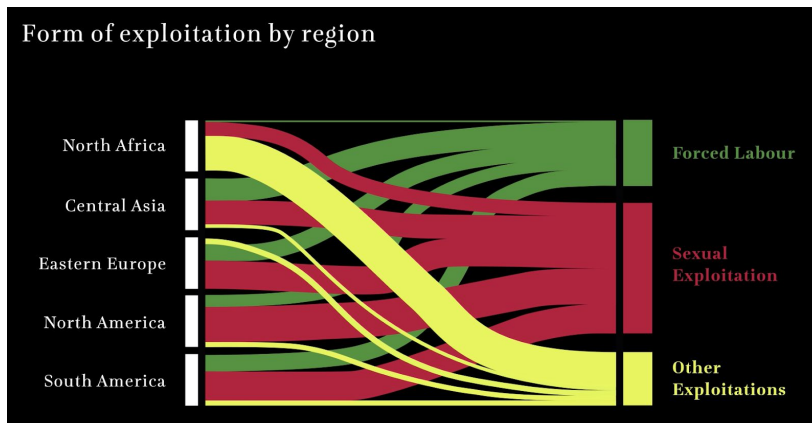

This visualisation shows source, transit and destination countries as nodes in a circle. The branches represent the trafficking routes taken from a source to a destination. The routes were given different colors to make them easily distinguishable.

Data acquired by

Wannes Vanwinsen

## 8. Form of exploitation by region (02:01-02:09)

### Data sources

Statista

<https://www.statista.com/statistics/300827/share-of-trafficking-victims-by-region-and-form-of-exploitation>

### Pre-processing methods

None used.

### Tools used

Excel was used to neatly organize the data.

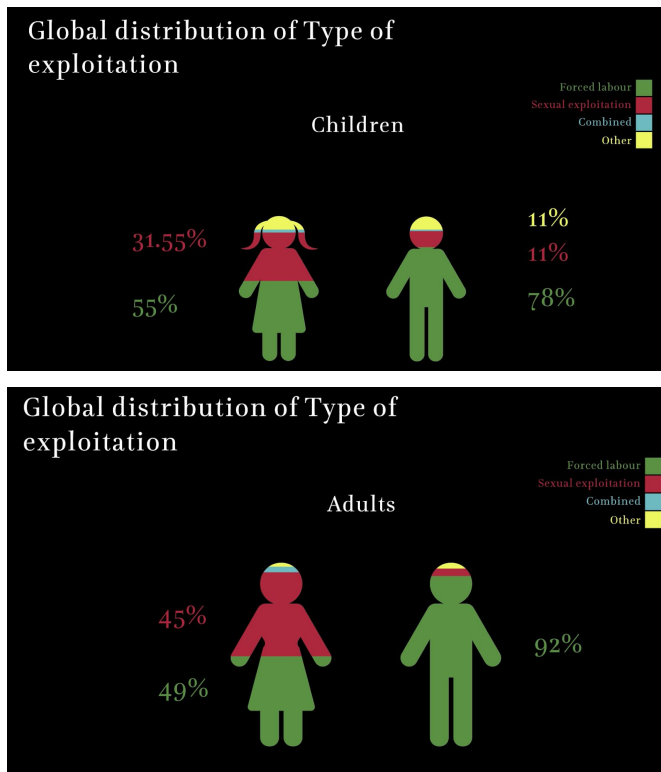

### Description

A Sankey diagram with world regions on the left Y-axis, and the exploitation types on the right Y-axis. Both Y-axes are connected with branches, of which the width represents the percentage of type of exploitation relative to the total amount of trafficking in that region.

### Data acquired by

Wannes Vanwinsen

## 9. Global distribution of type of exploitation (02:13-02:25)

### Data sources

COUNTER TRAFFICKING DATA COLLABORATIVE

<https://www.ctdatacollaborative.org/dataset/iom-data-dashboard/resource/c84a8813-ff95-4932-84d4-df33a9995e02>

<https://www.ctdatacollaborative.org/dataset/iom-data-dashboard/resource/503efd90-e1d5-41a7-9cda-2b503f5429f2>

<https://www.ctdatacollaborative.org/dataset/iom-data-dashboard/resource/a5970932-a467-45d5-a9b0-9732b41a0281>

<https://www.ctdatacollaborative.org/dataset/iom-data-dashboard/resource/51c59298-89d8-48fd-9988-1b669220616c>

### Pre-processing methods

Different data sets were acquired and put into new rows and columns.

### Tools used

Excel was used to neatly organize the data.

### Description

A stacked picto bar chart visualizing the percentage of how different genders and age categories are most prevalent in each exploitation type.

Data acquired by  
Jasper-Sebastian Häsler

## 10. Gender of victims in Europe (02:26-02:32)

### Data sources

*Counter Trafficking Data Collaborative*

<https://www.ctdatacollaborative.org/dataset/victims-europe-dataset/resource/596be2a6-32b9-46a2-9e81-4bae79f1c4e2#>

### Pre-processing methods

None used.

### Tools used

Excel was used to neatly organize the data.

### Description

A pie chart containing percentages of gender of victims identified in Europe. The pie slices correspond to the percentages.

### Data acquired by

Jasper-Sebastian Häsler

## 11. Psychological health consequences (02:42-02:54)

### Data sources

*Psychological consequences of child trafficking: A historical cohort study of trafficked children in contact with secondary mental health services*

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5843209/>

### Pre-processing methods

Rewrite of data acquired, the rewrite was then put into a data table.

### Tools used

Excel was used to neatly organize the data.

### Description

A donut chart with the actual numbers of the study, instead of percentages, corresponding to the slices in the donut.

### Data acquired by

Rayhan Aryoseno Bayuaji

## 12. Most recurring words in interviews on stigma (02:55-03:00)

### Data sources

*Unlocking the Roots of Stigma Towards Victims of Trafficking in Albania*

<https://digitalcollections.sit.edu/cgi/viewcontent.cgi?article=3522&context=capstones>

*'We are looked down upon and rejected socially': a qualitative study on the experiences of trafficking survivors in Nepal*

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4653321/pdf/GHA-8-29267.pdf>

### Pre-processing methods

Reports were put into Atlas.ti and coded according to phrases that correlate to stigma around the victims of human trafficking. The codes were then put into a typewriter word cloud, available in Atlas.ti. Connectives were then removed to ensure the sentence makes sense.

### Tools used

Atlas.ti was used to analyze, code, and make the word cloud.

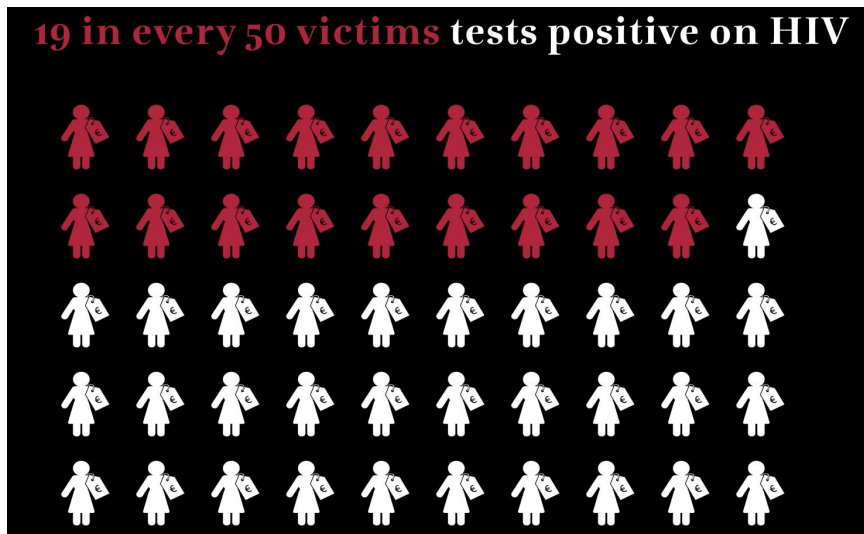

### Description

A typewriter word cloud of the most frequent recurring words in the interview documents. It is interesting to note that the word cloud formed a phrase right as the “word cloud” option was selected.

### Data acquired by

Rayhan Aryoseno Bayuaji

### 13. Number of victims who tested positive for HIV (03:12-03:19)

#### Data sources

*HIV: The hidden face of Human Trafficking*

[https://docs.google.com/spreadsheets/d/1U3\\_oC-unelxLwmD02yU6wMEjLXc1hHIJKfLdO8Jv0mk/edit#gid=0](https://docs.google.com/spreadsheets/d/1U3_oC-unelxLwmD02yU6wMEjLXc1hHIJKfLdO8Jv0mk/edit#gid=0)

*HIV Pervallence and Predictors of infections in sex trafficked nepalese girls and women*

<https://jamanetwork.com/journals/jama/fullarticle/208242>

#### Pre-processing methods

None used.

#### Tools used

Excel was used to neatly organize the data.

#### Description

A set of pictograms indicating visualizing the number of victims who test positive on HIV.

#### Data acquired by

Rayhan Aryoseno Bayuaji

#### 14. Compliance to TVAP Tier rankings (03:25-03:30)

##### Data sources

*Trafficking in Persons 2019 Report*

<https://www.state.gov/wp-content/uploads/2019/06/2019-Trafficking-in-Persons-Report.pdf>

##### Pre-processing methods

None used.

##### Tools used

Excel was used to neatly organize the data.

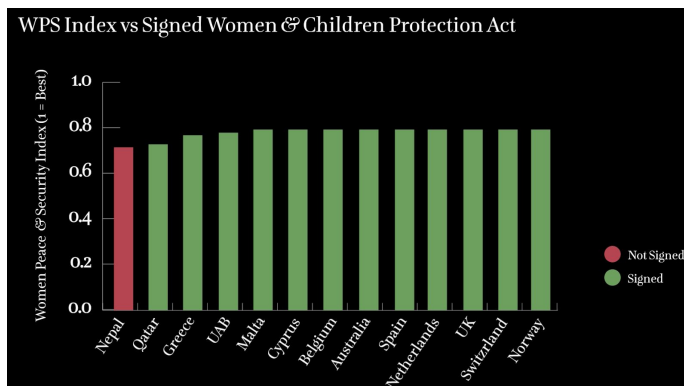

##### Description

A world map containing the tier rankings for the year of 2019. The tier rankings indicate how much effort a country's government puts into fighting human trafficking. Tier 1 indicates the most effort, while Tier 3 indicates little-to-no effort.

##### Data acquired by

Daffa Paramitha

## 15. WPS Index against Women and Children Protection Act (03:32-03:45)

### Data sources

*Trafficking in Persons 2019 Report*

<https://www.state.gov/wp-content/uploads/2019/06/2019-Trafficking-in-Persons-Report.pdf>

*Women, Peace and Security Index 2019/2020 Report*

<https://giwps.georgetown.edu/wp-content/uploads/2019/12/WPS-Index-2019-20-Report.pdf>

### Pre-processing methods

The data on which countries did not sign the *Protocol to Prevent, Suppress and Punish Trafficking in Persons, Especially Women and Children* was retrieved from the *Trafficking in Persons 2019 Report*. The *Women, Peace and Security Index* of these countries were then taken and put in a bar graph. Countries that were not included in the *Women, Peace and Security Index* (WPS) report were then omitted.

### Tools used

Excel was used to neatly organize the data.

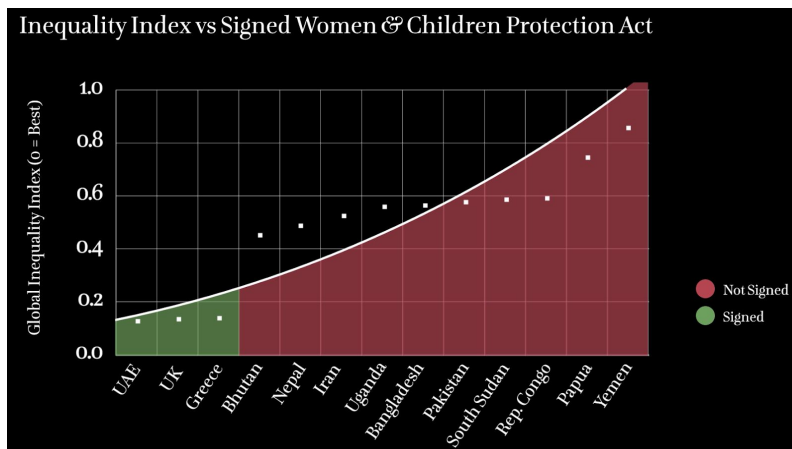

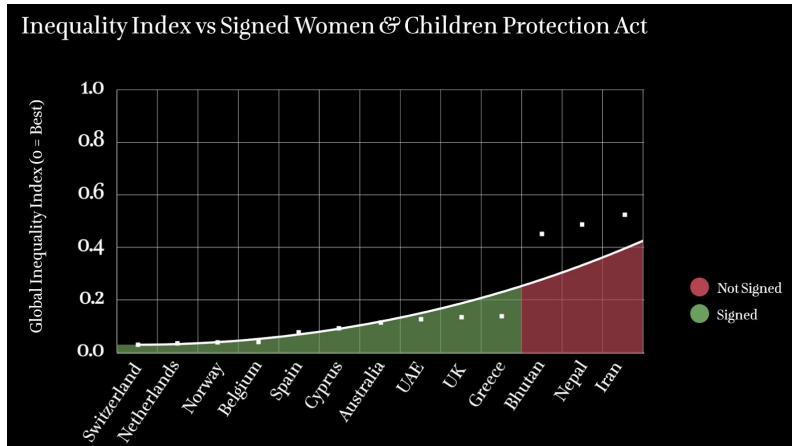

### Description

A bar graph showing the WPS index for countries who did not sign the protocol against the countries who did sign the protocol. It is interesting to note that the countries who have not signed the protocol scored significantly lower in the WPS index than countries who did sign the protocol.

Data acquired by  
Daffa Paramitha

## 16. Gender Inequality Index against Women and Children Protection Act (03:47-03:59)

### Data sources

Trafficking in Persons 2019 Report

<https://www.state.gov/wp-content/uploads/2019/06/2019-Trafficking-in-Persons-Report.pdf>

UNDP Human Development Reports on Gender Inequality Index

<http://hdr.undp.org/en/content/gender-inequality-index-gii>

### Pre-processing methods

The data on which countries did not sign the *Protocol to Prevent, Suppress and Punish Trafficking in Persons, Especially Women and Children* was retrieved from the *Trafficking in Persons 2019 Report*. The *Gender Inequality Index (GII)* of these countries were then taken and put in a bar graph. Countries that were not included in the *GII* were then omitted.

### Tools used

Excel was used to neatly organize the data.

## Description

A line graph showing the GII for countries who did not sign the protocol against the countries who did sign the protocol. It is interesting to note that the countries who have not signed the protocol scored significantly higher in the GII than countries who did sign the protocol. The relation seems almost exponential, which is very interesting to see.

## Data acquired by

Daffa Paramitha

## 17. Interactive visualization in Tableau

## Data sources

*Counter Trafficking Data Collaborative*

<https://www.ctdatacollaborative.org/dataset/iom-data-dashboard/resource/49c96acc-0931-462d-ba94-22d67511c711>

<https://www.ctdatacollaborative.org/dataset/victims-europe-dataset/resource/596be2a6-32b9-46a2-9e81-4bae79f1c4e2#>

## Pre-processing methods

The different datasets were combined and reorganized into new rows and columns.

## Tools used

Excel was used to neatly organize the data.

## Description

On the top is a line graph visualizing the percentage of the type of exploitation relative to the total trafficking cases. The bottom is a bar graph indicating the gender of the victims of trafficking. Both visualizations span over the years 2002-2018. The slider bar can be used to narrow the timespan of the data, which would affect both the line and bar graphs accordingly.

## Data acquired by

Jasper-Sebastian Häsler
